DECLARATION

I, _____ (Name) being the authorised management representative of _____ (Property name) declare that the animals described above for the pre export of BREEDER cattle (type/species of stock) to (country) VIETNAM comply with the following conditions:

1. The cattle originated from farms/premises not quarantined for any bovine health reason at time of certification.
2. The cattle have come from properties free of any known outbreaks or clinical symptoms prior to shipment from the following diseases:
 - a) Anaplasmosis, Babesiosis, Bovine genital campylobacteriosis and Trichomoniasis for the last twelve (12) months.
 - b) The cattle originated from farms/premises, clinically free from paratuberculosis (Johne's disease), bovine viral diarrhoea, malignant catarrhal fever, enzootic bovine leucosis, ephemeral fever, Q Fever, infectious bovine rhinotracheitis and leptospirosis for the last 3 years.
 - c) Bluetongue for the last three (3) years
3. The animals have originated from properties where there have been no reported outbreaks of Anthrax at least 20 days prior to export.
4. The cattle have never been fed with any kind of processed animal proteins excluding milk proteins.

Pre-Export Livestock Transport (in accordance with ASEL)

Please refer to the Australian Standards of Export Livestock <https://www.agriculture.gov.au/export/controlled-goods/live-animals/livestock/australian-standards-livestock>

Livestock have been mustered & handled to prepare for land transport to maintain health, welfare and fitness for travel. Feed and water curfews have been observed (ASEL S2.1.1, 2.1.3)

Livestock were inspected prior to loading and any animals showing signs consistent with rejection criteria in S1.1.6, Table 1 or any other condition that may cause animal health and welfare to decline during transit or export preparation, were not loaded (ASEL S1.1.6, 2.1.1)

Ensure any vehicles are of appropriate design, clean & maintained in good working order for the type of livestock being transported. Transport operators are responsible for this requirement & must maintain a journey logbook (ASEL S2.1.1).

Livestock drafted & loaded for transport by land were separated by class, species & size. Livestock with horns over 12cm were separated from other livestock (ASEL 2.1.1).

Working dogs are not transported in the same pens as livestock. Livestock will be unloaded and rested as specified in ASEL S2.1.1 and in accordance with state/territory legislation.

At unloading, the livestock become the responsibility of the management personnel of the PEQ/registered establishment. Livestock will be unloaded into registered establishment by competent stock handlers in a manner that prevents injury and minimises stress. Distressed or injured livestock must be given immediate assistance. Humane euthanasia is to be carried out if necessary (ASEL S2.1.1)

Livestock must be unloaded as soon as possible after arrival at the registered establishment. Livestock must be individually inspected at unloading to determine whether they are suitable for preparation for export (ASEL S3.1.15)

AUSTREX retains the right to reject cattle that are not transported and delivered in accordance with ASEL Standard 2 - Land transport of livestock
