

Property of Origin PIC	Days on Property Or BOP	# Head	Date left POO

I, the owner or representative of the cattle declare:

- No lame, blind, injured, sick or substituted animals will be loaded on road transport to the loading facility
- The livestock were born and raised in Australia
- To the best of my knowledge, the livestock sourced for export comply with Australian Food Safety requirements including standards for chemical residues or environmental contaminants.
- The animals are free from clinical evidence of any disease during the past thirty (30) days in particular, ringworm, pinkeye, lumpy jaw and dermatophilosis.
- The livestock and the property for export have been free of any known outbreaks or clinical symptoms for at least six (6) months prior to shipment for the following diseases: Tetanus, Malignant Oedema, Blackleg, Pulpy Kidney, Black Disease, Bovine Cysticercosis, Intestinal Salmonella (Salmonellosis), Theileriasis, Hendra Virus.
- The livestock and the property for export have been free of any known outbreaks or clinical symptoms for at least twelve (12) months prior to shipment for the following diseases: Infectious Pustular Vulvo-vaginitis (IPV), Anaplasmosis, Babesiosis, Botulism, Actinomycosis (Lumpy Jaw) Sporadic Bovine Encephalomyelitis, Trichophytosis (Ringworm), Contagious Ophthalmia (pinkeye), Dermatophilosis, Surra.
- The livestock and the property for export have been free of any known outbreaks or clinical symptoms for at least twenty-four (24) months prior to shipment for the following diseases: Rift Valley Fever, Bovine Genital Campylobacteriosis (Vibriosis) and Trichomoniasis
- All livestock and the property of origin showed no clinical signs or abattoir evidence of Enzootic Bovine Leucosis (EBL), Bluetongue, Mucosal Disease/Bovine Virus Diarrhoea (MD/BVD), Infectious Bovine Rhinotracheitis (IBR), Q Fever, Haemorrhagic Septicaemia, Ephemeral fever, Bovine Malignant Catarrhal fever, and Leptospirosis during the previous three (3) years.
- The animals and property have had no officially reported cases of Johne's Disease (Paratuberculosis) in the previous five (5) years
- I further declare that the animals have never been fed with any kind of processed animal products excluding milk protein.
- The animals for export originate from an area free from Anthrax for at least the previous twelve (12) months prior to export.
- I give permission for the relevant State Department to disclose animal health information relating to my property to a third party, for the purpose of the export of live animals that have resided on my property
- No livestock are within a withholding period or Export Slaughter Interval for antibiotics. The livestock do not contain hormone growth promotant (HGP) residues at levels harmful to human health, as determined by Codex Alimentarius food safety standards.
- Female livestock have not been treated with a prostaglandin drug within fourteen (14) days of export, and not during the 60-day period before export unless they have been pregnancy tested immediately before prostaglandin treatment and declared to be in the first trimester of pregnancy or not detectably pregnant.
- Transport: All livestock movements to a Registered Establishment will be by transport operators that will abide by the Australian Standards for the Export of Livestock (ASEL) in direct conjunction with Land Transport Standards. The land transport of livestock for export must meet any relevant animal health and welfare and road transport requirements under state and territory legislation and relevant requirements under national Model Codes of Practice for the Welfare of Animals.
